RE: DCR-D-25-01148R1, entitled "Ruling Out Early Distant Recurrence in Stage III Colon Cancer: A Simple Four-Variable Machine Learning Model with External Validation"

Dear Dr. Huang:

We are pleased to inform you that your work has been accepted for publication in Diseases of the Colon & Rectum, with the understanding that its contents, all or in part, have not been and are not under consideration to be published elsewhere. You will receive a FINAL acceptance letter when the manuscript moves to production.

Prior to submitting the paper for production, there remain some technical changes that must be made to the submission. Requested changes are itemized below.

The manuscript has been returned to your Author Center in Editorial Manager where you will find it under Submissions Needing Revision.

Resubmit your revised document through Editorial Manager (<https://www.editorialmanager.com/dcr>). We will then verify that these changes have been addressed upon receipt of a final revised manuscript from you.

OPEN ACCESS

If you indicated in the revision stage that you would like your submission, if accepted, to be made open access, please go directly to step 2. If you have not yet indicated that you would like your accepted article to be open access, please follow the steps below to complete the process:

1. Notify the journal office via email that you would like this article to be available open access. Please include your article title and manuscript number.
2. A License to Publish (LTP) form must be completed for your submission to be made available open access. Please download the form from <http://links.lww.com/LWW-ES/A49>, sign it, and upload the completed form to your submission.
3. You will be receiving an Open Access Publication Charge letter from the Journal's Publisher, Wolters Kluwer, and within instructions on how to submit any open access charges. The email will be from no-reply@copyright.com with the subject line 'Please Submit Your Open Access Article Publication Charge(s)'. **Please complete payment of the Open Access charges within 48 hours of receipt.**

RECOGNIZING YOUR WORK ON !

Diseases of the Colon and Rectum will distribute a link to your article to our social media (/Facebook) followers when your article is officially published! You have the option to customize this information. We request that you modify the underlined portions of the following template that we will distribute through our official accounts:

Structured tweet (140 character limit):

"Short Title" by @author(up to 2). @institution #ColorectalResearch @DCRjournal <http://bit.ly/1234567>

PROMOTING YOUR ARTICLE

Individual articles are chosen by our Journal to be promoted in a variety of different ways: news release, , Facebook, video abstracts, visual abstracts, and editor picks. We offer an ALTMETRIC detailed page, which shows the online attention and engagement activity of your research. Our publisher also promotes your work through FREE articles, email alerts, and promotions at scientific meetings. These may result in more downloads of your article.

Simply being social is a great way to get others to notice your important work. Social media mentions have been proven to at least double how much your article gets noticed. Thank you for your interest!

With Kind Regards,

Prof. Susan Galandiuk
 Editor-in-Chief
 Diseases of the Colon & Rectum

REQUESTED CHANGES:

1. Author Chao-Wen Hsu will need to respond to our e-mail re-sent on August 20, 2026. In that e-mail a link was provided to confirm contributing authorship of the paper and to be taken to a web page to answer the terms of the copyright agreement. These forms are mandatory for publication, and any missing forms will prevent us from assigning your manuscript to an upcoming issue.
2. In the text, superscript reference citations should be placed after the period or comma.
3. Be sure references are prepared in accordance with our Journal style, i.e., italicize the journal abbreviation in references 16 and 17; delete the number in parentheses provided in each reference; provide the complete last page number in each reference; delete the doi provided in each reference.
4. If applicable, provide written permission for any previously published tables/figures/supplemental content.
5. A Video Abstract (Personal Video Statement) is mandatory for all Original Contribution articles. The video must be no longer than 2 minutes and should highlight the article's content, key issues, and its significance. Please address one or more of the following:
 Significance: Why is your research important? What barrier does it address?
 Innovation: What new information or concepts does your study introduce?
 Clinical Applicability: How are your findings clinically relevant or applicable?
 Future Work: What future research directions stem from your results?
 Instructions and Tutorials:
 Editor-in-Chief Susan Galandiuk's tutorial:
<https://journals.lww.com/dcrjournal/pages/videogallery.aspx?videoId=61&autoplay=true>
 Section Editor Kyle Cologne's tips on avoiding common errors:
https://www.youtube.com/watch?v=9ZBWfaG_vpw&feature=youtu.be
 Quality Requirements:

Audio: Ensure clear sound, minimal background noise, and proper sync. Non-native English speakers may use text-to-speech tools if needed.

Video: Ensure the video plays correctly. Preferred formats: .mp4, .swf, .flv, .mov, .qt, .avi, .mpg, .mpeg, .m4v.

Length: Must not exceed 2 minutes. Longer videos will be returned for revision.

Professional video summary services are available at Editage: <https://www.editage.com/video-summaries/>

In compliance with data protection regulations, you may request that we remove your personal registration details at any time. ([Remove my information/details](#)). Please contact the publication office if you have any questions.
